Education

Vishwakarma Institute of Information Technology (VIIT), Pune
Bachelor of Technology in Computer Science and Engineering (AI & ML)

CGPA: 8.91
Aug 2023 – Jun 2027

Technical Skills

Programming Languages: Java, Python, JavaScript
Frameworks & Libraries: React.js, Vue.js, Node.js, Express.js, Flask
Backend & APIs: RESTful API, JWT Authentication, Celery
Databases: MySQL, PostgreSQL, MongoDB, SQLite, Redis
Cloud & DevOps: AWS, Docker & Kubernetes, Ansible, Linux, Jenkins and GitHub Actions (CI/CD), Git & GitHub, Postman
Core Concepts: Data Structures & Algorithms (150+ problems solved on LeetCode), Object-Oriented Programming, DBMS, Computer Networks, Operating Systems

Projects

- ChainDeFi** (chaindefi.in) Dec 2025 – Jan 2026
Tech: MongoDB, Express.js, React.js, Node.js, Full Stack, JWT, Solidity, Hardhat, Ether.js, DevOps Practices, AWS Services, Sepolia Testnet
 - Built a full-stack DeFi platform for microfinance services, featuring secure wallet integration, smart contract-based lending workflows with automatic loan repayment and AI-driven KYC verification, and administrative analytics dashboards.
 - Designed Solidity smart contracts and integrated Ethers.js to power decentralized lending, Soulbound NFT-based identity verification, transparent on-chain transactions, and automated financial workflows.
 - Architected REST APIs, JWT (HS256) and password hashing, protected via Helmet and rate-limiters, and verified by Jest test suites.
 - Automated end-to-end CI/CD workflows using Jenkins, Ansible, and AWS services, enabling reliable deployments and continuous application monitoring.
- FalcoVita** (falcovita.vercel.app) Sept 2025 – Dec 2025
Tech: Vue.js, Flask, Celery, Redis, OpenAI, RAG, Pinecone, Bootstrap, Chart.js, Google Space Webhook, AWS Aurora PostgreSQL, Jenkins, Docker
 - Solved booking conflicts and record clutter by building the developing of a decoupled hospital platform featuring 5+ services like RBAC portals, medical assistant, digital EHRs, and Celery/Redis async queues for automated notifications.
 - Built a RAG-based medical assistant using Pinecone vector database to enable real-time, semantically accurate document retrieval.
 - Architected a docker based CI/CD workflow using a Jenkins pipeline and Ansible playbooks and also orchestrating a production-grade AWS Aurora PostgreSQL database with 15+ schemas to handle and maintain patient's data persistence.
- IPO-Success-Predictor** (huggingface.co/spaces/NarendraSaraf/IPO-Success-Predictor) Jan 2025 – Mar 2025
Tech: NumPy, Pandas, Ensemble Learning (Bagging, Boosting), Hugging Face spaces, Machine Learning
 - Developed an IPO Success Prediction System leveraging ensemble learning (Random Forest, Gradient Boosting) and Hugging Face Spaces, achieving 80% prediction accuracy.
 - Automated end-to-end analysis pipeline, integrating data retrieval, feature engineering, and model prediction, saving 10+ hours per week in manual analysis.
 - Enhanced investment decision-making by providing near real-time IPO performance predictions, contributing to a projected 15% improvement in investment success rate.

Industry Programs

- EduSkills - Web Development:** Apr 2024 – Jun 2024
- Built 5+ responsive web applications using HTML, CSS, JavaScript, and Bootstrap with a focus on cross-browser compatibility.
 - Collaborated with mentors to implement backend integrations, reducing page load time by 30% and improving user experience.
- HawkWatch - MyWebRide** Jul 2024 – Sept 2024
- Developed AI-powered online proctoring system, implementing novel Machine Learning algorithms that reduced manual review time by an average of 70% for administrators.
 - Developed and Deployed cloud-based services of AWS, supporting scalable, highly available and fault-tolerant architectures.

Certifications

- Oracle Cloud Infrastructure Certified AI Vector Search
- Oracle Cloud Infrastructure Certified Data Science Professional
- Oracle Cloud Infrastructure Certified Generative AI Professional
- Google Cybersecurity Professional
